Professional Summary

Software Engineer with hands-on experience developing and testing secure, scalable software applications across full-stack environments. Experienced in translating requirements into reliable software, building RESTful services and responsive interfaces, integrating databases, and troubleshooting end-to-end application workflows. Strong foundation in programming, software engineering principles, secure development, and Agile practices, with a focus on solving complex problems, learning quickly, and building dependable solutions.

Technical Skills

Languages: C#, Python, Java, JavaScript, TypeScript, SQL, C++, C

Frontend: Angular, React.js, HTML5, CSS3

Backend: ASP.NET Core, .NET Web API, Entity Framework Core

Database: SQL Server

Cloud & DevOps: Microsoft Azure, Azure DevOps, Git, GitHub, Docker, CI/CD

Tools: Visual Studio, Visual Studio Code, SSMS, Swagger

OS: Windows, Linux

AI & Developer Productivity: GitHub Copilot, Microsoft Copilot, ChatGPT, Cursor, OpenAI Codex, Prompt Engineering, AI-Assisted Software Development

Concepts: Data Structures & Algorithms (DSA), OOP, DBMS, MVC Architecture, RESTful API Design, JWT Authentication, RBAC, Agile Development, Responsive Web Design

Testing: API Testing, Integration Testing, xUnit

Soft Skills: Adaptability, Collaboration, Effective Communication, Continuous Learning

Experience

Software Engineer – Capgemini India

Jaipur, India | Jan 2026 – Jun 2026

- Developed and tested a full-stack Workforce Management System using ASP.NET Core, Angular, SQL Server, and Entity Framework Core to support employee, attendance, leave, project, and administrative workflows.
- Designed and integrated secure RESTful APIs for employee management and business workflows using JWT authentication, role-based access control (RBAC), AutoMapper, and FluentValidation.
- Performed API and integration testing using Swagger and xUnit, troubleshooting frontend-backend issues and validating end-to-end application workflows for reliability and correctness.
- Applied Git-based development, Azure DevOps, CI/CD, debugging, and code-quality practices throughout the software development lifecycle.

Full Stack Developer Intern – MountDiggers

Remote | Sep 2025 – Nov 2025

- Developed and maintained a production-ready travel booking platform using React.js, Node.js, Express.js, and MongoDB, building responsive interfaces and end-to-end booking workflows.
- Developed and integrated RESTful APIs for trek management, traveller registration, booking workflows, and payment processing, including server-side transaction verification.
- Implemented JWT authentication and role-based administration while troubleshooting application issues across frontend, backend, and database layers.
- Collaborated directly with the startup founder to translate requirements into production features, rapidly prototype solutions, and improve customer-facing workflows and usability.

Projects

Workforce Management System | GitHub ↗

Jun 2026

ASP.NET Core | Angular | SQL Server | Entity Framework Core | JWT | Azure

- Architected and developed a modular full-stack application using ASP.NET Core 8, Angular 19, SQL Server, and Entity Framework Core, following a layered architecture with Repository and Service patterns for scalable and maintainable development.
- Implemented secure RESTful APIs using JWT Authentication, Role-Based Access Control (RBAC), AutoMapper, and FluentValidation, integrating Angular modules with backend services through Entity Framework Core Code-First migrations.
- Applied enterprise development practices using Swagger, Git, Azure DevOps, xUnit testing, and global exception handling to improve API reliability, deployment readiness, and code quality.

SmartHire – AI-Powered Hiring Platform | GitHub ↗

Jun 2025

React.js | Node.js | Express.js | MongoDB | JWT | Docker

- Designed and developed a full-stack AI-powered hiring platform using React.js, Node.js, Express.js, and MongoDB, enabling recruiters to manage job postings while allowing candidates to upload resumes and track job applications.
- Implemented secure JWT-based authentication, resume parsing, ATS compatibility analysis, and role-based workflows through RESTful APIs, supporting personalized candidate evaluation and recruitment processes.
- Built a modular full-stack application following the MVC architecture, implementing structured RESTful APIs, protected routes, centralized error handling, and Docker-based deployment to improve scalability, maintainability, and application reliability.

TasteTaxi – MERN Food Ordering Platform | GitHub ↗

Mar 2025

React.js | Node.js | Express.js | MongoDB | JWT | Docker

- Designed and developed a full-stack food ordering platform using React.js, Node.js, Express.js, and MongoDB, enabling users to browse menus, manage carts, place orders, and track order history through an intuitive interface.
- Implemented secure JWT-based authentication, dynamic cart management, checkout workflows, and role-based administration through RESTful APIs, supporting seamless customer and administrator experiences.
- Built a modular MERN application following the MVC architecture, utilizing Docker-based containerization, centralized error handling, and structured backend services to improve scalability, maintainability, and application reliability.

Education

Jaipur Engineering College and Research Center (JECRC)

Jaipur, India

Bachelor of Technology – Electronics & Communication Engineering

2022 – 2026

Leadership and Achievements

- E-Summit '25 Participant, IIT Roorkee (2025)** – Competed in the 'Mind the Product' case study challenge at the Annual Entrepreneurship Summit.
- Smart India Hackathon (SIH) Finalist (2024)** – Selected among the Top 15 teams nationally and developed a working software prototype under a 36-hour deadline.
- Model United Nations Organizing Committee (2024)** – Managed sponsorships, guest relations, and marketing for a two-day conference.
- Student Council Media Team Member (2023)** – Coordinated video editing and digital media campaigns to enhance student engagement.
